

THE UNIVERSE WITHIN  
The Human Body Revealed

Hello, I'm Edgar Loessin with Loessin at Large.

We expect Baci Entertainment to bring us first class productions of Broadway shows. The Universe Within is in no way related to musicals or Broadway. It is an astounding scientific exhibit of approximately 200 actual bodies and organs. Even so, since the human body is a masterpiece of creation, design and function, there are related values of the artistic and dramatic. One views the display with humility and awe. I felt an aura of special beauty as well,

We are our bodies, but since nature keeps most our parts hidden we don't often know what is hurting, for instance, looks like. The display of every single aspect of our physical construction lets us see what nature keeps concealed, except maybe what we see in X-rays which laymen can't always interpret.

These bodies and their organs have been preserved by a process called plastination developed in China. Plastic is used to replace bodily fluids, rendering the bodies rigid and odorless. The process allows the general public a glimpse of what normally only scientists and doctors are allowed to see. It's truly a very special once in a lifetime experience. And, we view them up close and without the smell of formaldehyde.

We are first introduced to the human body as a whole. We see the muscles and skeletal system in motion, like mummified dancers, to see the various muscle groups working together. The head and brain are looked at in many views and sections. It's amazing to see how small those sinus cavities are that can cause us such discomfort. You can see the entire cardiovascular system with red arteries and blue veins. Everything else is clearly in view as well, including healthy organs and diseased ones.

Let me assure you that there is absolutely nothing to feel squeamish about. I found myself quite curious and deeply involved with what I was seeing. The body is a truly an "intelligent product"

Remember HAMLET? "What a piece of work is man! how noble in reason! how infinite in faculty! in form and moving how express and admirable! in action how like an angel! in apprehension how like a god! the beauty of the world! the paragon of animals!" THE UNIVERSE WITHIN presents the superstructure that makes all this possible.

This is Edgar Loessin with Loessin at Large and I'll see you at the next opening..
